Transcript for slide 11.

Here is a hierarchy of prompts. Notice the direction of prompts from least to most intrusive and vice versa. So for the system of least prompts you would choose a prompt hierarchy starting with the least intrusive and moving toward more intrusive. Typically 3 to 4 prompts are in a hierarchy so an example of a system of least prompts hierarchy after the presentation of the natural cue might be a verbal prompt, model prompt, and physical prompt. Prompt hierarchies are very individualized so a hierarchy that works for one student may not work for another.
